

## Have You Evaluated All Areas Of Your Budget for Savings?

**Packaging is often overlooked as a place to pick up dollars in the budget. What areas should you be reviewing when considering the most cost effective packaging system?**

### **1.) Have you evaluated your per gallon or per pound packaging cost recently?**

Often it is overwhelming to compare packaging systems and know the best packaging solution. Take everything back to your per gallon or per lb. packaging cost. Once you have established your current per gallon or per pound packaging costs you can start comparing packaging systems. Expect to save with EZ-BULK **intermediate bulk containers** & EZ-SET **liquid bulk containers**.

### **2. How much is the inbound freight costing you on your current system?**

Too often we forget to look at the complete cost of the package. If you can save on your inbound freight you are saving on the cost per container. Every dollar counts when you are using packaging in volume. Expect to get roughly 448 qty EZ-BULK **disposable totes** and 312 qty EZ-SET **bulk packaging containers** for an inbound truckload.

### **3. How much warehouse space is your current packaging utilizing?**

Freeing up warehouse space is a great way to reduce your overall budget. Space equals money. If you can stack your product higher then you can pick up space for other aspects of your operation. How much space does the packaging you are utilizing now when it is filled and stacked on your floor? Don't forget to analyze what it costs you when it is empty and stacked out in your warehouse. Stack up to four high with filled EZ-SET **disposable totes**.

### **4. Can you reduce the number of containers by changing to a larger container?**

The larger the size, the less **bulk liquid containers** needed to get product out the door. Less containers purchased means less dollars spent. Typically the larger the container the lower your per gallon or per pound packaging costs. Paper Systems offers EZ-BULK **disposable liquid containers** and EZ-SET **liquid transport containers** in a range of bulk sizes 110 gallon, 220 gallon, 275 gallon, & 330 gallon.

### **5. How much are you spending on labor to fill your current packaging system?**

For every five drums filled, just fill one 275 gallon EZ-SET™ or EZ-BULK container. Filling one container is easier than filling five containers. Also one person can assemble an EZ-BULK or EZ-SET **corrugated liquid tote** in less than one minute. **Call Paper Systems today! We can help steer you into the most cost effective **bulk packaging solution** for your application.**
